MUHAMMAD ZAKKI MARDHI

TANGERANG • +6287831147530 • zakimardi@gmail.com

Frontend Developer (Typescript / React)

WORK EXPERIENCE

Infosys Solusi Terpadu **12/2023 - Present**
Front-end Developer • Full-time **Jakarta**

- Collaborated with cross-functional teams to design and implement robust, user-friendly website components and pages using React.js and Next.js, significantly enhancing user experience and product functionality for financial clients.
- Collaborated effectively with cross-functional teams to successfully deliver secure and fully functional websites, consistently achieving project goals and ensuring stakeholder satisfaction in a regulated environment.
- Integrated backend APIs using Axios, working closely with backend developers to ensure seamless, secure data exchange and robust application functionality critical for financial operations.
- Ensured optimal website performance and responsiveness across various devices and browsers, contributing to a consistent, accessible, and reliable user experience for all financial service users.
- Implemented robust form handling and data submission features, streamlining critical user interactions and ensuring accurate data capture processes for sensitive information.
- Managed state and data flow within complex applications, optimizing performance and ensuring predictable application behavior for a smooth and trustworthy financial user experience.
- Maintained high code quality standards and efficiently addressed critical bugs, ensuring stable and reliable software delivery and minimizing disruptions to critical financial services.
- Actively engaged in collaborative code reviews and continuous learning initiatives, fostering a culture of excellence and adopting best practices across the development team, particularly in security and compliance.

GMF AeroAsia **06/2022 - 08/2022**
Back End Developer • Internship **Tangerang**

- Independently developed a CRUD (Create, Read, Update, Delete) system using PHP and CodeIgniter to monitor document progress and aircraft maintenance, providing a foundational tool for operational efficiency and data accuracy in a critical industry.
- Gained practical experience with API experimentation using Postman and successfully integrated data from REST APIs into CodeIgniter applications, demonstrating foundational backend development capabilities and an understanding of data flow.

EDUCATION

Fullstack Web Developer Bootcamp
Purwadhika School 12/2022 - 02/2023

- Successfully completed intensive training in full-stack web development, encompassing JavaScript, React.js, Tailwind CSS, and the creation of APIs utilizing Sequelize and Axios.
- Recipient of the Bootcamp Scholarship (2023)

Bachelor of Computer Science in Informatics
Mercu Buana University • GPA: 3.69 Jakarta • 01/2023

Recipient of the Mercu Buana Scholarship (2019)

AWARDS & SCHOLARSHIPS

Mercu Buana Scholarship 01/2019
Mercu Buana University

PROJECTS

Back-Office Web Marketing & CMS Portal
08/2024 - Present

Bank Victoria (Infosys Solusi Terpadu)

- Architected an enterprise marketing & CMS portal using Next.js 14 (App Router), React 18, TypeScript, and Ant Design.
- Engineered a dual-control (Maker-Checker) approval engine across 7 banking modules with granular RBAC and Next.js Edge Middleware.
- Built a complex voucher management system with dynamic cashback rules, escrow reconciliation, and bulk batch uploads.
- Developed a secure CMS using Monaco Editor and React Quill with DOMPurify sanitization to eliminate XSS risks on mobile banking feeds.
- Built an interactive analytics dashboard and server-side reporting module using Recharts for high-volume dataset exports.

Virtual Account Customer Portal
04/2024 - Present

Bank Victoria | Infosys Solusi Terpadu

- Engineered the Virtual Account Customer Portal using Next.js 14, React 18, TypeScript, and Ant Design for corporate clients.
- Developed core VA Source of Funds (VA SoF), dynamic prefix routing, and multi-tier Maker-Checker approval governance.
- Architected a high-throughput batch VA processing engine with client-side Excel/CSV parsing and real-time schema validation.
- Implemented a resilient data layer using RTK Query with Axios interceptors for automated token refresh rotation and session recovery.

Virtual Account Back Office System
04/2024 - Present

Bank Victoria | Infosys Solusi Terpadu

- Architected core back-office banking modules for virtual account lifecycle management using Next.js 14, TypeScript, and Ant Design.
- Built an automated financial reconciliation and settlement interface for transaction matching, dispute verification, and fee calculations.
- Implemented a resilient networking layer using Axios interceptors with a token refresh mutex, automatic retry queuing, and Zustand state synchronization.
- Integrated Ant Design Charts dashboards and high-volume asynchronous report generation with real-time blob streaming.

Monthly Mutaba'ah Admin Portal & Evaluation System
07/2026 - 07/2026

Personal

- Architected a full-stack student character-tracking platform with multi-step evaluation forms and an admin dashboard.
- Implemented modular service-oriented architecture (Express/Node.js) with dynamic PostgreSQL composite indexing and response compression.
- Built dynamic server-side reporting with batch recap summaries and lazy-loaded Excel exports (saving ~500KB initial bundle size).

Digital Wallet Admin Portal
12/2023 - 06/2024

Infosys Solusi Terpadu

- Developed administrative features and resolved critical defects in a high-security digital wallet portal using Vue.js.
- Improved data visibility, transaction auditing stability, and operational efficiency for sensitive financial data workflows.

Document Monitoring System
06/2022 - 08/2022

GMF AeroAsia

- Developed a comprehensive CRUD monitoring system using PHP and CodeIgniter to track aircraft maintenance workflows.
- Streamlined document approval lifecycles and enhanced real-time data visibility in a regulated aviation environment.

SKILLS

- **Programming Languages:** CSS, HTML5, JavaScript, PHP, Python, SQL, TypeScript
- **Frontend Frameworks/Libraries:** Ant Design, Chart.js, Next.js (App & Pages Router), Nuxt.js, React.js, Recharts, RTK Query, Tailwind CSS, Vue.js, Zustand
- **Backend/Database:** CodeIgniter, Express.js, MySQL, Node.js, PostgreSQL, Sequelize, Supabase
- **APIs & Data Handling:** APIs & Security: REST APIs, Axios Interceptors, DOMPurify (XSS Sanitization), Edge Middleware, ExcelJS Blob Streaming, RBAC, Token Refresh Mutex
- **Tools & Methodologies:** Code Review, Financial Reconciliation, Maker-Checker / Dual Control Workflows, Performance Optimization, State Management, UAT/SIT
